SUMMARY

Software Engineer with 2+ years of experience designing and delivering scalable enterprise and EdTech solutions using C#, .NET Core, and ASP.NET Core. Proven expertise in building RESTful APIs, microservices, and data-driven applications leveraging SQL Server and MongoDB to ensure secure, high-performance systems. Strong full-stack development background with Angular, React, and Vue, complemented by hands-on experience in CI/CD pipelines, automation, and production support. Adept at optimizing system performance, engineering ETL workflows, and contributing effectively within Agile environments to deliver reliable, maintainable, and business-critical applications. Now, permanently residing in California, USA and seeking for Engineering opportunities.

SKILLS

- C#
- .NET Core
- .NET Framework
- ASP.NET Core
- Web API Development
- RESTful Services
- Microservices Architecture
- Entity Framework
- LINQ
- SQL Server
- MongoDB
- ETL Development
- Multithreading
- Async Programming
- AngularJS
- ReactJS
- VueJS
- Object-Oriented Programming (OOP)
- Design Patterns
- Git
- Azure DevOps
- CI/CD Pipelines
- Unit Testing (xUnit/NUnit)
- Agile / Scrum

WORK EXPERIENCE

Software Engineer

May 2025 – January 2026

ibex.| Lahore, Pakistan

- **Product Development & Module Engineering**
 - Develop and enhance core modules (CCStats, Pulse) for BundleDealer, ibex's flagship enterprise platform, using C#, .NET Framework, and .NET Core; deliver new feature development beyond utilities, implement scalable components, resolve production issues, and optimize performance across distributed systems.
- **Process Automation & Infrastructure Modernization**
 - Lead server migration initiatives and automate 120+ operational workflows using Windows Task Scheduler and PowerShell, improving deployment reliability, reducing manual intervention, and strengthening system stability.
- **Enterprise ETL & Data Integration Engineering**
 - Design and implement enterprise-grade ETL pipelines (SQL ↔ SFTP, MongoDB → SQL Server) supporting critical systems including CCLM Engine and BD Reporting Services; develop backup and migration utilities using MongoDB, SQL Server, and Entity Framework to ensure data integrity and high availability.
- **API Development & DevOps Enablement**
 - Build and maintain ASP.NET Core Web APIs and RESTful microservices leveraging LINQ, asynchronous programming, and multithreading; contribute to CI/CD pipelines using Azure DevOps, manage version control with Git, implement unit testing (xUnit/NUnit), and collaborate in an Agile/Scrum environment using Jira and MS Teams.

Tower Technologies, Punjab Group | Pakistan

- **Enterprise API & Backend Engineering**
 - Engineered and optimized RESTful APIs for large-scale educational platforms (PGC, UCP, LMDC, RIPHAH CMS, EMS, E-Books) using .NET Core, ASP.NET Core, Entity Framework, and LINQ; enhanced query efficiency, strengthened data validation, and improved backend performance within multi-campus academic systems.
- **Modern Frontend Application Development**
 - Developed dynamic, responsive user interfaces using AngularJS, ReactJS, and VueJS, ensuring seamless API integration, structured state management, and improved user experience across student portals, learning management systems, and content delivery platforms.
- **Agile Collaboration & Code Architecture**
 - Applied Object-Oriented Programming (OOP) principles to design modular and maintainable components; collaborated with cross-functional teams in an Agile/Scrum environment to deliver sprint-based releases, resolve defects, and support continuous platform upgrades.
- **Full-Stack Platform Development for EdTech Systems**
 - Developed and maintained scalable education management platforms, including CMS solutions for PGC, UCP, and RIPHAH, by implementing backend services in .NET and ASP.NET Core and building dynamic, responsive user interfaces using AngularJS, ReactJS, and VueJS to support high user engagement across academic portals.
- **API Architecture & Data Modeling Optimization**
 - Designed and optimized RESTful APIs and relational data models to ensure secure and efficient frontend-backend integration; improved data flow, query performance, and system responsiveness within multi-campus content management environments.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2019 – 2023

- University of Central Punjab | Lahore, Pakistan
 - Completed a comprehensive undergraduate program focused on Software Engineering, Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, and Web Application Development. Built strong foundations in C#, .NET technologies, relational databases, and full-stack development through academic projects and practical implementations.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **LinkedIn Learning** – HTML Essential Training, CSS Essential Training, Responsive Web Design
- **DigiSkills.pk (Government of Pakistan Initiative)** – WordPress Development, Freelancing
- **IELTS (International English Language Testing System)** – English Language Proficiency Certification

LANGUAGES

- English (Fluent)
- Urdu (Native)
- Punjabi (Native)
